From the Leiden Gazette, dated Dec. 9.

Vienna, November 26.

YEsterday in the Afternoon General Heister went Post from hence for Hungary, to put himself at the Head of the Imperial Army, in order to enter upon Action against the Malecontents of that Country. The same day a great Sum of Money was remitted for paying that Army: The same day the Regiment of Imperial Horse of the Prince of Hanover went from hence to reinforce the said Army, and is to be follow'd shortly by a Reinforcement of 14000 Men, that are coming from Bavaria, the Upper Austria and other Parts: And care is already taken to lay up Provisions in this City and Places adjacent, for subsisting those Troops with Victuals and Forrage necessary come when they will. They write from Buda that the Malecontents draw together in great Numbers and in several Bodies in the Neighbourhood of that Place; and that they have sent in Waggons a considerable Number of Pontons to Nesmulh, with design to lay a Bridge there over the Danube, in order to enter into the Lower Hungary; but part of the Imperial Cavalry has pass'd the Danube at Comorra, to endeavour to frustrate this Design. The Fortifications of the Fort of Fuldwart being perfected, the Governour of Buda has sent thither several Pieces of Cannon, and some Ammunition and Provisions. Advice is come, that General Rabutin has routed a Body of Malecontents of 5000 Men, in Transilvania; has demolish'd the Fortifications of divers Places and withdrawn the Garrisons, to the end he may make up a Body of Forces sufficient to reduce the Malecontents of that Country.

From the Amsterdam Courant, dated Dec. 9.

Vienna, Nov. 26. The Malecontents of Hungary, presuming that the State of Affairs in Italy and Piedmont, and the long Defence made by the Garrison of Landau, would detain the Imperialists from pressing them vigorously, have since they took Newheusel sat down before Leopolstad; and we fear they will render themselves Masters of it, by Composition with the Garrison, who we know to be at Variance among themselves. A Report is spread, that Prince Ragotski has sent a strong Detachment towards Pest, with Orders to invest Buda; as also that the Turks begin to lend a more favourable Ear than hitherto they had done to the Proposals made to them by the Malecontents. Some Advices say the Turkish Governours on the Frontiers make some Difficulty of suffering Provisions to be put into Arrath. It having been resolv'd that General Heister shall attack the Malecontents before they have put themselves into a formidable Posture of War; 45000 Crowns were advanc'd to him, and he went from hence yesterday to put himself at the Head of the Troops in Hungary. He is order'd not to go far from the Danube, lest when that River is frosen the Malecontents should pass over it, and prevail with the Inhabitants of the lower Hungary, who we hear are but too well affected to Prince Ragotski, to revolt again. To day Mr. Whitworth, the English Minister, set out from hence for Muscovy.

The same day came in the Tryon, Captain England, the Philip and Edward, Captain Ward, the Vere Frigate, Captain Bradford, of 300 Tuns carrying 22 Guns, and the William and Elizabeth of and for London, Captain Richard Hamlin, carrying 26 Guns; all from she West-Indies. The Vere Frigate, Captain Bradford Commander, after she came into the Soundings was attack'd the 25th past, by a French Privateer of 26 Guns, but she gave the Privateer so warm a Reception, that in a little time she shear'd off, having done her very little Damage. The next day another Privateer of about 30 Guns, came up with and immediately boarded the William and Elizabeth, Captain Hamlin Commander, and having entred about 50 Men on her Poop, they soon cut a Hole into it and threw in a Hand-Grenado, which fell into a Barrel of Powder and blew up and destroy'd all the said French Men, one only excepted, who is much wounded; who saith that the same Privateer had before taken Eight of our homeward-bound West-India Merchant Ships. In the Action with this Privateer Captain Hamlin had 1 Man kill'd and 11 wounded. Tho' these 2 Ships only were close engag'd the other 2 kept near, and also fired on the Privateers; and after the Fight they were follow'd 2 days by the French Privateers, but about 8 Leagues from our Harbour came up with 2 Flushing Privateers, to whom the said 4 Merchant Ships advanc'd 200 l. to be Convoy'd safe into this Port. Yesterday came in the Concord of Flushing of 34 Guns, and brought in with her the Experiment of London, of about 240 Tuns and 10 Guns from Barbadoes, which she re-took the 26th Ult. from a French Privateer which had 2 other English Ships in Tow, viz. the Swan and Brigantine of London, both from the West-Indies.

These are to certifie (for the Publick Good, as well as the Just Reputation of that famous Oculist Dr. WILLIAM READ, who lives in Durham-yard in the Strand, London) that in the month of November 1704, John Warner Son of Mr. Samuel Warner of the third Troop of Her Majesty's Guards, who lives next door to the Castle in Queen-street near the Seven Dyals, was absolutely blind on both Eyes in that manner that all the Chyrurgeons and Physicians that had used their utmost Endeavours, look'd upon him as incurable by reason one of his Eyes was sunk in his Head by a Discharge of the Aqueous Humour occasion'd by an Impostumation; notwithstanding the great danger he was in, the said Dr. READ (Her Majesty's Oculist) hath restor'd him to his perfect Sight of both Eyes by his extraordinary Care and Skill, which being matter of Fact, shall always be attested by me

Clark, but also perfectly cured in all other respects, to the great Satisfaction of Her Majesty and Her whole Court. This is to give Notice, that his Grand Ophthalmick Secret, which he then made use of, and has since been successful in the Recovery of 3 Noble Peers, not only Cures the Gutta Serena or Blindness thro' Obstructions of the Optick Nerves as aforesaid, but dissolves the Seed of Cataracts, and takes away Dimness, Mists, Clouds, Motes, Flyes, Gnats, Sparks and Cobwebs from before the Eyes, thereby preventing those dangerous Effects which (too often) cause a total Deprivation of sight.
